§ 24.241 Decolorizing juice or wine.

(a) *Conditions and limitations.* If the proprietor wishes to use activated carbon or other decolorizing material to remove color from juice or wine, the following conditions and limitations will be met:

(1) The wine will retain a vinous character after being treated with activated carbon or other decolorizing material;

(2) The quantity of activated carbon used to treat the wine, including the juice from which the wine was produced, may not exceed twenty-five pounds per 1,000 gallons (3.0 grams per liter) (see paragraph (b) of this section); and

(3) The wine treated with decolorizing material will have a color of not less than 0.6 Lovibond in a one-half inch cell or not more than 95 percent transmittance per AOAC Method 11.003-11.004 (see paragraph (c) of this section). However, the proprietor may produce a wine having a color of less than 0.6 Lovibond or more than 95 percent transmittance per AOAC Method 11.003-11.004 by using normal methods and without the use of decolorizing material.

(b) *Transfer in bond.* When a consignor proprietor transfers wine treated with activated carbon or other decolorizing material to a consignee proprietor, the consignor proprietor shall record on the shipping record:

(1) The amount of wine which has been treated under the provisions of this section; and

(2) The quantity of decolorizing material used in treating the wine, including the juice from which the wine was produced, before its transfer. § 24.242 Authority to use greater quantities of decolorizing material in juice or wine.

(a) *Proprietor's notice.* If the proprietor desires to remove color from juice prior to fermentation or if color in excess of that normally present in wine develops during the production or storage of a particular lot or lots, and if the proprietor desires to use activated carbon in excess of twenty-five pounds per 1,000 gallons (3.0 grams per liter) of juice or wine to remove this color, the proprietor, prior to starting the treatment, shall submit to the appropriate TTB officer a written notice for each lot of juice or wine to be treated for decolorization. The written notice will state

- (1) The reason for the treatment;
- (2) The volume, kind, and type of juice or wine to be treated;
- (3) The kind and quantity of decolorizing material to be used; and,
- (4) The length of time the decolorizing material is in contact with the juice or wine.

(b) *Action by the appropriate TTB officer on proprietor's notice.* Upon receipt of the proprietor's notice, the appropriate TTB officer may require the proprietor to submit samples representa-

- (i) The juice or wine before treatment with decolorizing material,
- (ii) The juice or wine after treatment with decolorizing material, and

(2) *Chemical analysis.* If the TTB chemical analyses of the samples shows that the proposed treatment would remove only color and will not remove the vinous characteristics of the wine, the appropriate TTB officer will return an approved copy of the proprietor's written notice. If the TTB chemical analysis shows that the proposed treatment is not acceptable, the appropriate TTB officer will send the proprietor a letter stating the reason(s) for disallowing the proposed treatment.
